

Rules and Regulations Implementing the Telephone Consumer Protection  
Act of 1991 CG Docket No 02-278

To whom it may concern,

I have the honor of being one of the few telemarketers that had to manually dial a sales call. My entire career in the telemarketing industry has been under the TCPA act of 1991 having started my career the summer of 1992.

I cannot see the point of this amendment and hope that our government has larger issues to tackle. I feel this will be a huge loss of jobs for good, working class, tax paying people in a time that jobs are needed. My job is in Quality Assurance for Interactive Teleservices in Columbus Ohio. We sell great products and services to people that take the time to listen. I am part of a team that ensures the customers get what they want and know what they are getting. I take pride in being part of an industry I have watched and grown with.

Sincerely,

Terry Galloway
